Battery-Powered Crimping/Cutting Tools

The most comfortable and efficient solution.

EK1240L

Pistol Grip Tools feature: Auto Retraction Stop OR Retraction Stop Repeat

Ergonomic Handle with Overmolded Tacky Grip

Ergonomic Handle with Overmolded Tacky Grip

Battery LED Monitor

LED Work Light

Lithium-Ion Battery

Choice of 120V, 12V or 230V battery chargers

EK425L

Jaws Open Automatically When Crimp Is Complete

Interchangeable Cutting And Crimping Jaws

Rotates 350° To Fit In Tight Spaces

325 Crimps Per Battery Charge

Slim, Lightweight Profile For One Handed Operation

4 second cycle time

More Intelligent

- The EK425L provides 6-tons of crimping force.
- All tools automatically retract when the cutting or crimping cycle is complete and ready for the next operation.
- Pistol grip tools have a "Retraction Stop" feature. The operator can stop the ram retraction at any point by simply tapping the trigger. This saves time and battery life when making repetitive cuts or crimps.
- LED light provides the operator with the battery charge and tool maintenance status.
- Two-stage hydraulic system on pistol grip tools provides fast advance and power speeds, saving time.
- Smart chargers control the charging current, charging voltage and battery temperature to maximize battery life.

More "Green"

- Greenlee battery-powered cutting and crimping tools now use biodegradable oil.

More Power

- State of the art 18V lithium ion (Li-ion) battery provides 70% more cycles per charge and faster cycle times.
- Available with 120V, 12V or 230V battery charger.
- Available with 120V or 230V corded adapter in place of batteries and charger.

More Ergonomic

- Forward handle position improves tool balance.
- One trigger controls all tool functions.
- Over molded tacky grip areas make gripping the tool easier and more comfortable.
- LED work light illuminates dark work areas.
- On all tools the head rotates 350° to aid getting into tight locations.

The New Standard...

Gator® Battery-Powered Crimping and Cutting Tools from Greenlee have always represented the most comfortable and efficient solutions when it comes to reliable cutting of cables. However, outstanding results are no reason for us to rest on our laurels. On the contrary, we are always committed to improve the good and make it even better. The result: our new tool generation with Lithium-Ion power.

When it comes to battery tool intelligence, efficiency and ergonomics, Greenlee Gator® Tools are **faster**, **safer** and **easier** than ever before.

LEGEND OF FEATURES:

IntelliGRIMP™ Technology

18V Lithium-Ion Battery

Automatic Retraction Stop

Retraction Stop Repeat

LED Work Light

Battery & Crimping Force LED Monitor

Crimping Force in TONS

Crimping Tool that does not require die set
DIELESS

EK425L Crimping Tool

6-TON

18v
Lithium-Ion

Greenlee has taken the best in class EK425 and packed it with additional exclusive features to make the crimping task faster and easier while providing assurance that each crimp is complete. The EK425L is operated with one hand, leaving the other hand free to position the cable and connector. The crimping jaws open wide to fit easily over connectors. To help prepare for a crimp, the jaws can be jogged closed until they just grip the connector, allowing the operator to position the cable in the connector before finishing the crimp. The EK425L will complete about 325 crimps per battery charge on 4/0 AWG splices. When a crimp is fully completed, the EK425L signals the operator by automatically opening the jaws. It is then ready to make the next crimp. And, when the crimping jaws need to be opened before a crimp is complete, the operator can simply push a button on the back side of the tool.

EK12IDL Dieless Crimping Tools

12-TON

DIELESS

18v
Lithium-Ion

Dieless tools greatly simplify the crimping of color coded lugs and splices. There are no dies to select and install, and with a dieless tool, you will never discover that the dies you need are back at the truck, or worse, back at the warehouse. The EK12IDL combines the simplicity of dieless crimping with the ease, features, and portability of battery power. #4 - 1000 copper lugs and splices. #6 - 1000 aluminum lugs and splices.

EK1240L & EK1240CL Crimping Tools

12-TON

18v
Lithium-Ion

The EK1240L accepts all industry "U" style crimping dies. With a throat opening of 1.65", it is easy to get around and remove from connectors. The crimping head rotates 350° to easily get into tight locations. The EK1240CL has a PVC covered crimping head.

ESG45L Cable Cutter

18v
Lithium-Ion

This tool is designed specifically to cut ACSR, guy strand including EHS, and ground rod. The flip-top style cutting head is the most durable on the market. Cuts up to 1590kcmil ACSR and 1/2" EHS guy strand.
